

PASTE WIZ

PasteWiz®88 Hi-Temp joins AXEL family of paste waxes, PasteWiz® and PasteWiz®HC.

The new PasteWiz®88 Hi-Temp is a lower cost alternative to the standard AXEL PasteWiz®. PasteWiz®88 Hi-Temp paste wax easily outperforms all other commercially available paste waxes in the market.

PW88 is a mold release agent great for FRP, plaster, wood, and metal molds. It effectively seals porous areas of mold surfaces resulting in smoother surfaces. The new PasteWiz®88 (PW88) paste wax features include:

- Easy cloth/foam pad pickup of the PW88 in all climates – cold, or hot
- Quick and easy application - 3 x faster than traditional PasteWiz®!
- Buffs easily after only 2-3 minutes of dry time
- Suitable for high temperature molding
- Excellent High Gloss for cosmetic applications

Apply a light coating of PasteWiz®88 with a clean cotton cloth and allow to dry for one to three minutes. Hand polish easily with a cotton cloth for a lustrous shine. Available in 400gram tins, 6lb cans, 30lb pails, and 350lb drums.
