StyroSafe Resin® and Duratec StyroShield Primer®

For use with Expanded Polystyrene Foam (EPS). Use low-cost EPS in place of Urethane tooling board or MDF for fast, economical patterns, shapes and decorative features.

Duratec StyroShield Primer (707-019)

- Spray through HVLP guns for fast foam coverage.
- Can also be applied by brush or roller.
- Can be over-coated with GP Laminating resin within two hours at room temperature.
- Overcoat with water-based paints, or polyester primers, or urethane topcoats. Great grip on EPS, and a high-adhesion anchor for laminates or paints.
- Cover 80 ft² per gallon.
- Grey, so it is easy to see where applied on white, blue or red foam.

StyroSafe (30P106A)

- A laminating resin that makes a protective barrier over eps foam.
- Forms a barrier, allowing the use of Polyester Laminating Resins, Polyester Tooling Putty or Duratec Primers.
- Recently improved low temperature cure, faster cure at room temperature.
- A special polyester resin/monomer package that will not chemically attack EPS foam.
