

CHEMICIDE NO 7

Fuel Biocide

PRODUCT USAGE:

CHEMICIDE NO 7 is a bactericide/fungicide particularly effective in controlling bacterial and fungal growths that form at water-hydrocarbon interface in diesel storage tanks.

CHEMICIDE NO 7 is miscible with diesel fuel and establishes toxic concentrations in both the fuel and the water phases.

SPECIFICATIONS:

Form:	Liquid
S.G.:	0.95
Colour:	Clear to pale liquid
Solubility:	Soluble in diesel
Flash Point:	75°C.

DOSAGE:

Use 20 - 40 ml or 1 - 2 litre product in 4,000 litre Diesel.

APPLICATION:

CHEMICIDE NO 7 should be applied in one of the following ways:

- In-line mixing when filling fuel tank.
- Addition to a partially filled tank. Topping up with additional fuel ensures proper mixing.
- Pump around of fuel in tank after addition of the biocide.
- Allow to stand for 6 - 8 hours for maximum kill effect.

BENEFITS:

- Fuel soluble biocide
- Partitions across fuel/water interface
- Effective against fungi and bacteria
- Non corrosive to tank materials, sealants and coatings
- Prevents plugging of fuel filters and fuel lines

Ref. No. 11/17

DANGER: Keep out of reach of children. Product is corrosive and can cause eye and skin damage.

FIRST AID:

In case of contact with eyes and skin flush immediately with plenty of water and get medical attention.
